<input type="checkbox"/> Safe Tires (good tread, no slicks, no stretched tires)		<input type="checkbox"/> No fluid leaks (fuel, oil coolant)	

Dyno and Tune Waiver:

By signing, the customer certifies that the vehicle is their own property, insured and their own responsibility. The customer accepts all risks associated with ECU tuning and the use of a dynamometer and will not hold STM Tuned Inc, any employees or any business location responsible if their motor blows up, a strap breaks, the dyno breaks or if any other similar event takes place while tuning.

Modifying a vehicle for street use is illegal in many states. The customer certifies the vehicle is not driven on public roads where such acts may be illegal or the vehicle is for competition track use only. Modifying a vehicle beyond factory power levels can result with engine damage. Customer attests that the vehicle is in safe, working condition with no leaks, loose bolts or other hazards that may render a dynamometer dangerous.

We reserve the right to deny ANY car for ANY reason. Our main concern is safety. If the vehicle requires additional services or labor to continue properly with the tune, the customer will be responsible for any additional costs. If the vehicle causes damage to the dynamometer or requires excessive clean-up, the customer may be responsible for extra charges.
